

TAPING STATIONS

Built to Shield's signature standards of durability, our taping stations are engineered with the needs of athletes and athletic trainers in mind.

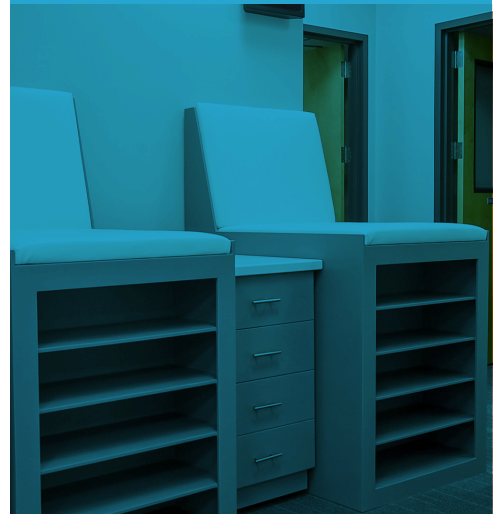

Patented solid surface construction holds up to all kinds of abuse so you don't have to worry about them falling apart at the seams. Heavy-duty, patented embedded metal inserts create a metal-to-metal connection that keeps doors from sagging and wiggling loose.

Our customization options offer completely cleanable surface, backrest support and convenient storage areas. Shield's full line of equipment looks good and performs even better—season after season.

FEATURES

- One seat, two seat and three seat options standard
- Shield's signature solid surface construction

- Embossed or embroidered seat logo
- Integrated waste bin

STEP 3. SOLID SURFACE OPTIONS

STEP 4. LAMINATE OPTIONS

STEP 5. UPHOLSTERY OPTIONS

Choose from our standard colors, or custom match your school color

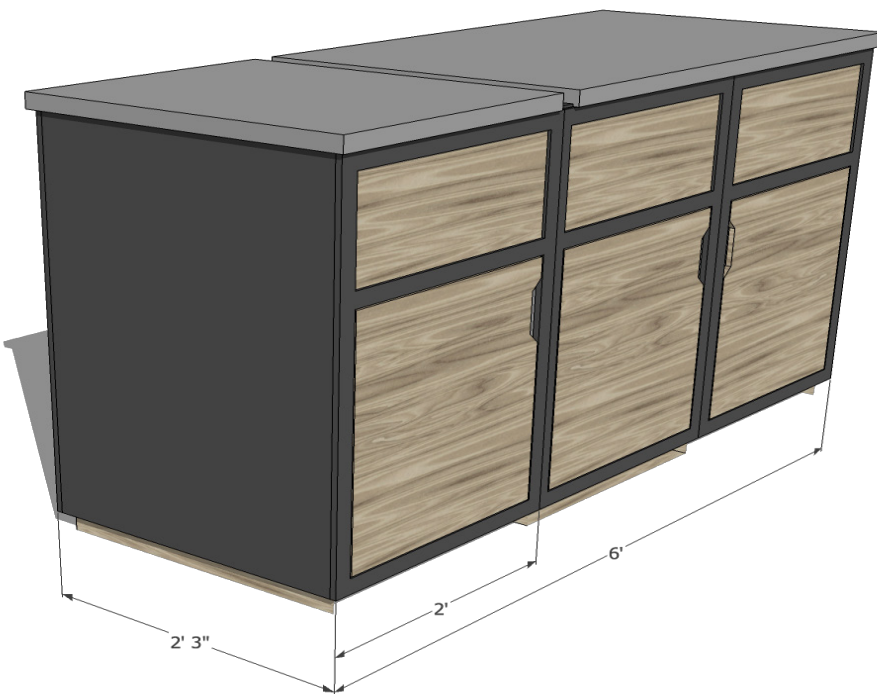

TREATMENT TABLES

Used for treatment in sports medicine clinics, college and professional athletic training rooms, physical therapy settings, and hospitals, Shield's treatment tables are the best on the market.

Available as flat tables or as adjustable tables with multiple head and/or leg elevation options, these treatment tables have cabinets and drawers to contain supplies for easy access.

The split leg design gives close examination access and allow athletic trainers to attend to the athletes in a more efficient way than a traditional table. Each padded leg rest is adjustable and locks into the desired height placement.

FEATURES

- High density foam pads with medical grade vinyl
- Shield's signature solid surface construction
- Laminate and graphic options
- Ships fully assembled
- Backed by Shield's unmatched limited lifetime warranty

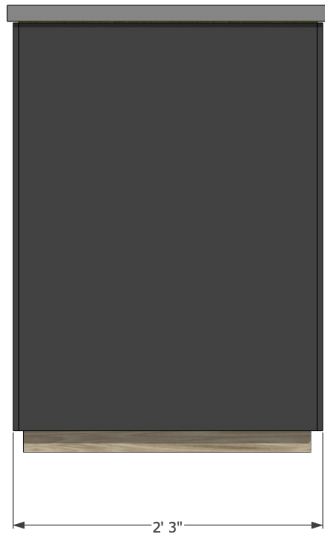

OPTIONS

- Graphics+ logos
